

Private Equity

The Investment Process

Could you do it on your own?

What is Private Equity?

How does it make Profit?

Private Equity Acquisitions

PE firms typically close 1-2% of the deals they see.

Private Equity Investment Process

1. **Fundraising & Setup:** PE firms raise capital from investors.
2. **Deal Identification:** Identify target companies.
3. **Deal Evaluation:** Due Diligence and analyze target companies' financials, operations, and growth potential.
4. **Acquisition:** Structure the transaction, purchase the company, often using a mix of debt and equity.
5. **Value Creation:** PE firms work to improve profitability, operations, and growth.
6. **Exit:** The firm sells the business via secondary sale, a strategic buyer, or an IPO.

Private Equity

Value Creation & Dispositions

Private Equity Investment Process

1. **Fundraising & Setup:** PE firms raise capital from investors.
2. **Deal Identification:** Identify and assess potential target companies.
3. **Deal Evaluation:** Due Diligence and analyze target companies' financials, operations, and growth potential.
4. **Acquisition:** Purchase the company, often using a mix of debt and equity.
5. **Value Creation:** PE firms work to improve profitability, operations, and growth.
6. **Exit:** The firm sells the business via secondary sale, a strategic buyer, or an IPO.

Investment Lifecycle

Private Equity

Capital Calls and Distributions

The Harvest and Distribution Phase of a fund follow initial years of Capital Calls and Investments:

ILLIQUIDITY PREMIUM

- Commitment Funds
- Investor holds the cash until it is "called", up to 30 days prior to closing an investment
- The capital is locked up until the company is sold

Private Equity

Fees & Profit Distributions

Fee structure ensures alignment between limited partners and the managers of the fund

Private Equity

Quick Recap

- ✓ Invest in yourself, invest in your business, invest in passive income
- ✓ Key Benefit of PE: Higher returns with lower volatility
- ✓ Barriers to entry historically have limited this asset class to large sophisticated investors
- ✓ Private Equity Fund Structures
- ✓ Private Equity Investment Process
- ✓ Private Equity Fees

Now let's talk about the opportunities ahead! —————→

SMB “Great Wealth Transfer”

- **Massive Wealth Shift:** Over the next 20 years, approximately \$68 trillion will be transferred from Baby Boomers to younger generations, making it one of the largest wealth transfers in history.
- **Business Ownership Transition:** Millions of small to mid-sized businesses are expected to change hands, as many business owners retire without succession plans, presenting prime acquisition opportunities.
- **Economic Impact:** Involves around 2.3 million businesses and over \$5 trillion in revenue, highlighting the critical need for strategic investment and management.

Aging Population of U.S. Business Owners = Opportunity for SMB Private Equity Investors

Takeaways

Your 5 Takeaways

What should you be doing?

1

Invest in yourself, invest in your business, invest in passive income

2

Look at your asset allocation: Where is your wealth concentrated today?

3

How do you get access to other alternative asset classes like PE, RE equity? (Cardone Capital, Cardone Equity Group, 10X Wealth Club)

4

Get educated on managing your wealth and the investment process (10X Wealth Club)

5

Talk to us:

A) Do you want us to do the work for you (CEG, CC, etc)?

B) Do you want to go at it alone (talk to our 10X BuySell team)

WHAT WAS WRONG?

SEC DECIMATED OUR IPO MARKETS (March 16, 2011)

Small IPOs have gone the way of the dodo bird.

Sources: Dealogic, Capital Markets Advisory Partners
Data includes corporate IPOs as of 12/31/10, excluding funds, REITS, SPACS and LPs.

U.S. listing have decreased by over 42% since 1997. Listings are indexed to 1997.

Sources: World Federation of Exchanges, Capital Markets Advisory Partners, Grant Thornton LLP.

WHY DID WE PUSH FOR THE JOBS ACT?

- To Make it Easier For Entrepreneurs:
 - To Raise Equity Capital
 - Within Private Markets
 - Extend Runways to IPOs
- Only Major Capital Access Legislation of the Last 84 Years

Jeff Rojels

A company that has a free behind will be able to sell for a higher multiple.

When you want to go public, you need to create an equity story for investors.

IPO!

most companies that go public are sub-billion \$ companies

Going public is just one more form of exit.

Biggest benefit of going public is you have a public currency, that makes you more trusted and you become the acquirer.

Each firm with 3-4 specialties, anything with technology enabled, businesses that can grow are those are more likely to go public.

most important things for small businesses - perfect the free of the business to the whole world. correct data, lawyers, accountants, etc. And have a solid story.

perfectimize the business!

Brandon Dawson & David Weild.

If you want to run a public company, you need to follow a list of rules or you'll get in trouble.

Go to where all the money is.

A lot of games get played when you have leverage and a large company.

There are as many companies from 100k - 1mil to 1mil - 10mil, etc.

You're spending money today to save the money tomorrow.

We learn more from our failures than we do from our successes.

Diversity brings different perspectives.

Our younger generations need to have better opportunities than we do now.

Brandon Dawson

It's not what you think, it's what you're not thinking of that gets you in trouble.

If families suffer, communities suffer.

Mitch Smith

Problem is multiple brokes trying to sling people

How do we structure everything through H&I

-Presentation

“Needing **insurance** is like needing a **parachute**.
If it isn't there the first time,
chances are you won't be needing it again.”

Money Managers focus on managing market risks in hopes they will keep pace with or potentially outperform capital markets.

Financial Planners focus on
attaining specific financial objectives
based upon the odds those market risks
will work for or against you.

We protect, enhance and grow, providing holistic solutions that will hedge or potentially alleviate those risks.

The History

IRC Section 7702

Under current tax laws and for much of the past century, life insurance has offered attractive tax favored status.

7702	Defines the use of life insurance for tax-deferred growth
7702A	Sets the maximum limit that can be put into a life insurance policy and receive most favorable tax treatment
72	Allows for tax-free policy withdrawals to basis from a non-MEC (modified endowment contract) policy
1019(g)	Defines how a life insurance death benefit may be accelerated tax-free in the event of chronic or terminal illness
101a	Allows life insurance death benefit to be passed along income tax-free to the beneficiary

- o IRC Section 7702 sets forth tests to define whether a life insurance contract may be treated as a life insurance contract for federal tax purposes.
- o Implemented in 1984, the tests were enacted to limit the investment orientation of a life insurance policy.
- o A life insurance contract can satisfy Section 7702 either by the Guideline Premium Test (GPT) or the Cash Value Accumulation Test (CVAT).
- o Any policy that does not meet one of the two actuarial tests under Section 7702 (GPT/CVAT) will lose the favorable tax treatment of a life insurance policy.
- o In 1988, Section 7702A further clarified how cash value distributions beyond basis are to be taxed if the policy is a Modified Endowment Contract (MEC).
- o 7702 rates change January 2021, creating an increase in what is allowed per year into a policy, therefore potentially improving the investment side.

This presentation is for informational purposes only. IRC Section 7702

Under current tax laws and for much of the past century, life insurance has offered attractive tax favored status.

7702	Defines the use of life insurance for tax-deferred growth
7702A	Sets the maximum limit that can be put into a life insurance policy and receive most favorable tax treatment
72	Allows for tax-free policy withdrawals to basis from a non-MEC (modified endowment contract) policy
1019(g)	Defines how a life insurance death benefit may be accelerated tax-free in the event of chronic or terminal illness
101a	Allows life insurance death benefit to be passed along income tax-free to the beneficiary

- **IRC Section 7702** sets forth tests to define whether a life insurance contract may be treated as a life insurance contract for federal tax purposes.
- Implemented in 1984, the tests were enacted to limit the investment orientation of a life insurance policy.
- A life insurance contract can satisfy Section 7702 either by the Guideline Premium Test (GPT) or the Cash Value Accumulation Test (CVAT).
- Any policy that does not meet one of the two actuarial tests under Section 7702 (GPT/CVAT) will lose the favorable tax treatment of a life insurance policy.
- In 1988, Section 7702A further clarified how cash value distributions beyond basis are to be taxed if the policy is a Modified Endowment Contract (MEC).
- 7702 rates change January 2021, creating an increase in what is allowed per year into a policy, therefore potentially improving the investment side.

Insurance and Tax Law

1963 - The tax court held that the cash values of life insurance, including growth, are not “constructively received” by the owner. As a result, they are not subject federal, state and local income taxes. (Theodore H. Cohen, 39 TC 1055 (1963), acq. 1964-1 CB-4)

Policy loans do not generate immediate income tax liability for the policyowner because they are not treated as distributions for tax purposes. The loan proceeds are not included in taxable income as long as the policy remains in force. However, if the policy lapses or is surrendered, the outstanding loan proceeds will be includable in gross income to the extent that the proceeds exceed the initial investment.

1990 GAO Report to the Chairman (Congress) clearly stated, “if a policyholder borrows the inside buildup from his or her life insurance policy, the amount borrowed is considered a transfer of capital, not a realization of income, and, therefore, is not subject to taxation. This reasoning is in accord with tax policy.”

Income & Planning Benefits

Life Insurance (7702 Model)

Tax Deferral	Yes
Income Tax Elimination	Yes*
Capital Gain Tax Elimination	Yes*
Not includable in AGI Tax	Yes*
Estate Tax Elimination	Yes (dependent on ownership structure)
Exempt from Generation Skipping Tax	Yes (dependent on ownership structure)
Estate Planning Applications	Yes
Annual K-1 Reporting	No
Ability to Borrow Against Policy Cash Value	Yes** (pg 6-7)
Ability to Withdraw Principal Tax Free***	Yes** (pg 6-7)
Provides Death Benefit	Yes
Does not Decrease Social Security Benefit	Yes
Does not Increase Medicare Premiums	Yes

39 TC 1055 (1963), acq. 1964-1

Business & Continuation Planning

Have a strategy for tax, obligations and legal risks that could arise if something happens.

- Almost **two-thirds of businesses are family-owned**, and almost 70% of family businesses don't survive the second generation, 12% to the third.
- Of those planning to transition to family, over three-quarters (77%) are worried about doing so while retaining family harmony and avoiding discord.
- Only 21% had a formal plan to transfer their share of the business at their death or disability.
- Of the business owners who did have a plan, many have not updated their plan in years.

- ✓ Buy Sell
- ✓ Key Person
- ✓ Inheritance Equalization

Business & Continuation Planning

Any **successful business** is a combination of three factors:

- ✓ Capital
- ✓ Labor
- ✓ Management or LEADERSHIP

Those who mean the difference between success and failure **must be insured**.

Business & Continuation Planning

Would you want to be in business with a spouse of a co-owner?

Would you like to have your interests in the business purchased if..?

Do you have family members not involved to provide for?

How confident are you that the active and inactive members of your business could successfully work together?

Have you and the other owners discussed what will happen if one of you leaves the business?

Do you have any type of arrangement already worked out between you and the other owners?

Would you want to be in business with a spouse of a co-owner?

Would you like to have your interests in the business purchased if..?

Do you have family members not involved to provide for?

How confident are you that the active and inactive members of your business could successfully work together?

Have you and the other owners discussed what will happen if one of you leaves the business?

Do you have any type of arrangement already worked out between you and the other owners?

Key Employees

Who are the key employees or "superstars" in your business?

Have you ever thought about transitioning your business to them?

Would this person have the ability to purchase the business?

Would you ever consider having the business become employee-owned?

Hedge Strategy

Adjusted Gross Income Tax Reduction

Keep your tax bracket down by integrating life insurance distributions (loans).

\$150,000 of retirement income would typically see taxes of \$29,400, before state.

OR

\$100,000 of retirement income from the portfolio

\$50,000 from an insurance holding would see taxes of \$12,000.

A decrease of 50%[†].

Tax Data from Smart Asset Website Calculator. Assumes approximately 50% capital gain and 50% income tax in FL. This presentation is for informational purposes only. Whether or not this strategy will be suitable for you depends on a number of factors regarding your needs, as well as assumptions about mortality, insurance pricing, savings, assets, market conditions and historical figures and taxes. Neither EPIC, Vanbridge nor its representatives, offer tax and legal advice. More total investment assets by blending the future distribution.

50 Years Old, CT Resident. Modeled to begin net distributions of \$500,000 at age 65, inflated at 1.75%.

Will have \$17,500,000 of Investment Assets at 65 in the model prepared, assumption of an annual premium within the life policy \$250,000/yr. for 15 years.

Indexed Universal Life. Distributions are considered loans from the policy and lower the death benefit by that amount. Personal Portfolio of 60% equities and 40% bonds/cash, 20% turnover, 0.50% NQ (0.50% Q) management fees/funds, etc. Assets at 65 (NQ) \$14,500,000 (Q) \$3,000,000. Hypothetical tax rate 32% Income and 27% capital gain, basis of approximately 45% of assets.

Initial Example: Hypothetical level distribution income stream based on the year(s) 2000+ 60/40 allocation.

Per guidelines, loans, as long as the policy remains in force, may be free from any taxation.

Product modeled in this hypothetical: Symetra Accumulator Ascent IUL, projecting 5.50% average annual return, End of year values. Create a Restricted Executive Bonus Program

These are estimates and figures are approximate. History is no guarantee of future results.

The client wanted to use a flexible and attractive bonus program for an executive.

Company is bonusing \$150,000 per year.

Would like to have \$100,000 in the program.

- Executive pays tax on bonus of ~\$45,000 per year.
- Company double bonuses to assist in some of the tax, \$22,500.
- Net Cost to Executive, \$22,500 per year.

Executive

- Age 60: \$700,000 tax-free lump sum available guaranteed OR \$2,100,000 (assuming 5%), some tax may be due.
- Age 65: \$1,296,553 tax-free lump sum available guaranteed OR \$2,700,000 (assuming 5%), some tax may be due.
- Age 65: Option to take income of \$205,000 per year tax-free.
- Life Insurance \$1.75MM increasing to about \$3MM.
- Executive received a 10%+ guaranteed return with upside.

Restrictive agreement, an employee repayment obligation, and an opportunity for the employee to make after-tax contributions with tax free income.

- Employees can potentially choose investments. Guaranteed Indexed options or funds.
- Tax treatment is similar to a Roth IRA with none of the restrictions.
- The restrictive agreement requires employees to seek consent from the employer before accessing cash during the first 10 years in the plan.
- Can have a repayment obligation requiring employees to repay the bonus on a rolling five-year schedule if they leave the company.

One of the primary benefits of a SLAT is asset protection.

By transferring assets to an irrevocable trust, they are shielded from potential creditors, lawsuits, or financial risks.

- When assets are transferred to the trust, they are effectively removed from the grantor's estate.
- Any appreciation in the trust's value is also excluded from the grantor's taxable estate.
- Despite the irrevocable nature of a SLAT, the non-grantor spouse can still receive income distributions and, in some cases, access to principal.
- These distributions can provide financial security and support the non-grantor spouse's lifestyle while maintaining the trust's tax advantages.
- SLATs offer a degree of control and flexibility to the grantor.
- Although the grantor cannot directly access the trust's assets, they can dictate the terms of distributions and appoint trustees who share their objectives.
- Additionally, SLATs can be structured to allow the grantor to change beneficiaries in the future, providing flexibility to adapt to changing family circumstances.
